The Captain Dancy Meetings

Mirror made a splendid response to the national program of Canadianization and Community service on the event of Capt. S. N. Dancy's visit on Friday last, and was the occasion of an enthusiastic rallying of community spirit which reflected in the wholehearted welcome accorded to the distinguished speaker in all his meetings.

The local W.I. sponsored the program, assisted by the Elks. On the arrival of the speaker at noon, commenced a most enjoyable and educational day for the people of the community. The program made a wonderful impression on the local citizenry and the good results are already making themselves apparent.

The luncheon at noon, sponsored by the Women's Institute was a huge success, the tea room being filled from twelve o'clock until the noon lecture was over.

As a point around which he built his talk to the luncheon guests, Captain Dancy stressed the need of a common ground, with a common goal and a common ideal for all classes of citizenry. He particularly urged the need of a live Board of Trade for Mirror district and, with a wealth of fact and incident, he built a case in support of this appeal that is already beginning to bear fruit in plans for active organization.

To impress upon each citizen the need of unselfish service, that each must accept his just share of the burden of the community and eliminate the pernicious practice of transferring that responsibility to the shoulders of others, eloquently and convincingly, Capt. Dancy drove home the truth with telling force. He speaks in very plain language and straight from the shoulder, and, as Mayor McDonald said in thanking him, nothing could be more timely for the people of Mirror than a talk of this character.

Capt. Dancy's talk at the school was an interesting one and was attended by quite a few of the business men. For an hour he held the interest of the school children, and, with plenty of humorous up situations packed into a well rounded up talk setting forth the need and value of education and good citizenship, he had the boys and girls with him all the way and the questions that developed later proved the interest that had aroused.

The meeting of women, held in the Elks hall, attracted a large number of women. Mrs. Flawell presided in her usual capable manner and Capt. Dancy was given an enthusiastic reception.

The big community gathering in the Grand theatre was the climaxing feature of the day. The hall was filled to its capacity and a fine spirit pervaded the gathering. Hugh McNair, Exalted Ruler of the Mirror Elks, was chairman, and, preceding Capt. Dancy's address, a number of community songs were sung, including a gymnastic number. Rev. R. G. Wood, our departing minister was then called to the platform and on behalf of the Elks was presented with a beautiful pen and pencil set. Canadianization was the background of Capt. Dancy's talk in the evening and was well received.

Local Brevities

Mr and Mrs J. H. Sorum and Mr and Mrs Kruikshank and nephew, Tom, Messrs G. F. Estell and R. D. Dye took in the bull sale at Lacombe on Thursday last. Mr Estell purchased a fine two-year old Shorthorn bull, winner of second prize in his class. It tipped the scales at 1300. Some bull!

Mrs Machon of Dewberry, Alta., has been visiting with her sister, Mrs Heald.

Ed. Buelow purchased a Chrysler and Theodore Hagen a Paige from the Mirror garage.

Mrs E. W. Aylsworth entertained at three tables of bridge Thursday evening at the home of Mrs Harry Williams, in honor of the May birthdays of Mrs H. G. Williams, Mrs C. L. Coburn and Mrs L. L. Ray. Small gifts were presented to the honored guests. The other guests present were Mrs Walker, Mrs McCormack, Mrs McNair, Mrs Kerr, Mrs Stirling, Mrs Smithers, Mrs Thomas, Mrs Cormack and Mrs Astle. The honors went to Mrs Smithers and Mrs Cormack. A dainty midnight lunch was served. All gifts, prizes and cakes served, were ordered from members of the Ladies Aid.

The Imperial Hotel opened this week, the work of renovation being just about completed. Mr Haggarty in his careful and businesslike manner, has made a wonderful change in the hotel and one visit will convince the patron of the high order in which it is being managed.

Farewell Party

The members of the L.O.B.A. and the L.O.L. held a farewell social for Rev. R. G. Wood in the Elks' home on Thursday evening, June 7th. The early part of the evening was spent in games and music and at midnight all sat down to a dainty supper. At the conclusion of the supper hour, Mr Keeton, acting as chairman, made a few very appropriate remarks. Referring to the real regret the members of both lodges felt in having to say good bye to one who had been a splendid officer and a true brother. He then called on Past Mistress Mrs Rowden who in a few well chosen words stressed the sense of loss felt by the L.O.B.A. at the removal of their Chaplain and on behalf of both lodges presented Rev. Wood with a fitted leather writing case. In accepting the gift Mr Wood spoke in his usual gracious manner thanking the members for the kind expression of good will. Mr Trotter was then called upon and voiced the appreciation of the L.O.L. of the many fine qualities of their departing Worshipful Master. The evening closed with the singing of "For he's a jolly good fellow" and "Auld Lang Syne".

He voiced the need of broad, human understanding between individuals, organization, communities and nations, and laid the cornerstone of Canadianization and world peace. He was given an ovation at the termination of his address.

Following the program, an informal dance and social hour brought to a close a highly profitable day, and not till the wee small hours of the morning did the big crowd begin to leave the hall.

Hon. Vincent Massey Speaks On Peaceful Relations Between Canada And The United States

"The peaceful relations between Canada and the United States are founded on practical principles," said Hon. Vincent Massey, Canada's minister of the United States in a speech before the American Peace Society, delivered at Cleveland.

In conveying the greetings of Canada, Mr. Massey said that he happened to be the only representative of British America present, and he might be permitted to add to Canada's good wishes those of Newfoundland, the British West Indies and all the countries in America which owe allegiance to the British crown.

Canada and the United States, said Mr. Massey, had gone a long way towards a solution of the problem of peaceful neighborliness.

"We may point with some pride to a tradition of tolerance and common sense in our dealings with each other," he said. "It is true in our constitutional moments we refer to the peaceful border in unrealistic imagery, but underneath our rhetoric there is solid fact. No two nations can point to an achievement like that of the international joint commission, which for fifteen years and more has been settling intricate and delicate questions in connection with the waters on our boundary line. It is a matter for deep satisfaction that, in quite a recent time, the fact, in a long list of cases there can be discovered no instances where dissatisfaction has arisen over the orders of this body. Its orders have never

been disobeyed, although it possesses no power of police or enforcement powers. What a triumph in international co-operation there is in this fact, that in all its cases this commission has never divided along national lines, and only once was it divided at all. We may well regard the work of this body as an impressive example as to how two neighboring nations, which are accustomed to trust each other, may deal with common problems."

This principle of arbitration in Canadian-American relations has been embodied in the policy of both countries since the Jay-Gentilis treaty of 1794, providing arbitration as a means of settling boundary disputes. Mr. Massey pointed out. The principle then set up had been scrupulously observed ever since.

"More human beings are now bent on preventing wars; more people are thinking in terms of peace, than ever before. Governments are directing their energies to this end as they never have done in the past. Do we hear more of war? The fact is that we are more conscious of the cruelty and futility of war than ever before, but there lies the hope that the consciousness of a disease is the first step towards its diagnosis and cure."

Seeing Sights the World Over

Possibly you have a friend who was a passenger on the round-the-world cruise of the Canadian Pacific Steamship "Empress of Australia." If so, you have already heard the stories of ports visited, and the strange sights witnessed. In clubs, homes, and lecture halls you will hear about where the passengers saw the largest Buddha in Japan, how the Whangpo River, China, looks in the moonlight with its queer craft silently scurrying with unknown cargoes from various ports, while from the cabin comes the wailing of the Chinese flute.

Then there is the spectacle of the various year movements now going on throughout the world. In spite of the epidemic, the road to peace was open.

"The Canadian minister expressed great faith in the practicability of the various year movements now going on throughout the world. In spite of the epidemic, the road to peace was open."

his flute charm a deadly poisonous snake, naively playing on the musical covers of the reptile to such an extent that he gradually passes from side to side in accompaniment to the Oriental music. Photo shows a moment of the desert being carefully shaved by his attentive chauffeur, incidentally the owner looks over the canal's teeth to see if any are in the stage where pulling is necessary. In get gives a silhouette at sunset on the river Nile.

Greatest Aids To Agriculture

Agriculture in Canada has received most benefit from Non-Farmers. Agriculture's greatest aids in Canada during the last 10 or 20 years have come from men who have never farmed. J. H. Evans, deputy minister of agriculture for Manitoba, told the Legislature recently.

"A doctor who had never farmed learned in 1850 that wheat rust had different spores, and if these could be destroyed the fungus would be eliminated," Mr. Evans said. Pathologists had been using that information as a basis for research ever since. Pasteur, the French chemist and scientist, had brought immunizable needles through his "pasteurization process" evolved in 1867 to aid wine-makers whose products were spoiling. William Sanders, a druggist, had hybridized many brands of wheat to select the best and produce the grade known as Marquis.

Mr. Evans asserted that it was not very encouraging to the farmer, after years and much money spent to grow better seed and better stock, to have to sell those products for a low price "dictated by the business."

The Canadian Hockey Mountain consist, geologically of the returned edges of the strata underlying the Great Central Plain of North America.

Some men drop all of their money trying to pick up more.

Mineral Springs Of Canada

Spring Water With Curative Powers Occur In Many Parts Of

Bondules.

The production in mineral waters in Canada in 1927 amounted to 303,429 gallons, valued at \$14,684, and was derived from mineral springs located in Ontario and Quebec. Spring waters containing minerals in solution, or as they are usually termed, mineral waters, occur in many parts of the Dominion. Many of them are utilized commercially, both as potable waters and for bathing purposes. At several of the springs where the waters have curative properties, hotels and sanitariums are operated. Some of the thermal springs are utilized principally for mineral baths.

Shorthorn Cow With A Record U. A. Roan Lady, 101st, -16347- a registered Shorthorn cow in the herd of the University of Alberta, Edmonton, recently completed a 365 day test during which she produced 15,428 pounds of milk with an average test of 4.5 per cent, making a total of 694 pounds of butterfat. This record places her sixth highest in Canada in point of butterfat production for Shorthorn cows.

No young man can succeed if he is afraid to do a little more than he is paid for.

The notes to which the strings of a violin are tuned are G, D, A, and E.

Canadians Living In U. S. Will Erect Memorial At Ottawa As A Confederation Gift

A sketch of the May memorial to be erected in the Parliament Buildings at Ottawa, as a Confederation gift from Canadians resident in the United States, has just been published in New York. The sketch submitted by Dr. R. Tait McKenzie, of Philadelphia, and approved by the National Memorial committee, symbolizes the development of Canada.

Four figures occupy the immediate foreground. On the left is Canada enthroned, her right hand on a shield emblazoned with the arms of United Canada of today, her left outstretched to receive the offerings of her children. She wears a head dress with caribou antlers and the short chiton and sandals of Diana; a youthful girl, the figure, the youngest of the Nations.

The central figure is a small child, the Canadian of the future, staggering under the weight of the wheat sheath he is bringing. Behind him and partly supporting him is a stalwart youth, the Canadian of the present, relinquishing his rifle looking forward to Peace and Union. Behind him a young woman kneels and receives his life with her hand and with the other pours out from a basket the fruits of the earth at Canada's feet.

The engineer is stepping down into the theodolite on his shoulder. At his heels comes in procession, the lumberman, with his axe, and the fisherman with his net, established on both coasts before the land was settled. Farther back at the side is seen a group: a man, with a hunter's rifle, and a woman and child, standing among the trees in front of the settler's cabin. On the opposite side an Iroquois Indian lurks in the forest watching them.

The upright pine trunk forms a frame through which is seen the figure in low relief of Joseph Carlier on the deck of his ship, as he sails up the St. Lawrence. Kneeling behind him a Jesuit priest upholds the cross; a reclining figure of a religious character of the first settlement of Canada.

The relief of the figures becomes more and more prominent as the figures on the foreground stand out boldly, almost in the round.

The panel is about ten feet square and is supported on a pedestal about three feet high on which the inscription will be carved.

There are approximately a million and a quarter men and women of Canadian birth resident in the United States. To give expression to their sentiment of pride in and devotion to their native land this memorial at Ottawa was proposed. The sixteenth anniversary of Confederation, celebrated last year, provided a fitting opportunity to present it. It will be erected at a cost of \$50,000, the sum is to be raised by public subscription among Canadians residing in the United States.

Through the courtesy of the Canadian Government the most desirable site within its gift was made available to the Memorial Committee and accepted. This location is a large park in the main corridor of the Parliament Buildings leading to the Hall of Fame and opposite to and balancing the Memorial group already erected there to the Nursing Sisters in the Great War.

Time was of course too short to consider the erection of the Memorial itself for unveiling at the Jubilee ceremonies in Ottawa on July 1, last. A temporary tablet, was therefore made, placed within the panel the memorial will occupy and in the presence of His Excellency Vincent Massey, Governor-General of Canada, W. L. Mackenzie King, Prime Minister, and a distinguished gathering, solemnly unveiled and formal presentation made by W. L. Colpitts as chairman of the National Committee. The gift was gratefully accepted on behalf of the Canadian people by the Governor-General and the Prime Minister.

The Tablet reads: "In the sixtieth year of the Confederation of Canada and in commemoration of this event Canadians who live in the United States will cause a memorial to be erected here in token of their devotion to the country of their birth and as a proud tribute to the achievement of its foundation."

Truth Essential To Success I find great pleasure in a truthful man. One can depend on what he says, and learn from him. But no one puts any strain on a liar, or much respects him. I have never known a really successful man who is a liar. Men of that disposition soon learn if engaged in real affairs, that truthfulness is a drag. The suit of clothes wears in swimming.

WILL HAVE CHARGE OF WOMEN'S SPORTS

Adhering strictly to the policy that women's sports should be handled exclusively by women, the Canadian Olympic committee accepted the recommendation of the Women's Athletic Federation and appointed Miss Marie Parkes, chaperone, and Miss Alex. Gibb manager. They will have charge of the women track and field athletes on the trip to Amsterdam. There may be some girl swimmers recommended by the Canadian Swimming Association, and if so they will

be in charge of the ladies appointed, both of whom are eminently qualified for the position. Miss Gibb has been an outstanding figure in girls sports for some years and was manager of the Canadian ladies' team in 1925, which visited England. Miss Parkes has been actively associated with women's sport at the University of Toronto and with the Women's Federation of Canada of which she has been secretary since its formation.

FINDS HAPPINESS

Malina-Alex Schumacher, eight years old, a Polish orphan, who travelled 7,600 miles alone to find a new home. On her arrival at the Canadian National Railways station, Winnipeg, she was met by her new parents.

Want Air Post Chief

First Time Such a Position Has Been Advertised

Probably the first advertisements of their kind are in process of issue by W. Foran, secretary of the civil service commission, as a result of the decision of the Department of National Defence, to hold competitions for the positions of air harbor manager, at the St. Hubert airbase near Montreal, and inspectors, civil aviation, at Ottawa. The air harbor manager will have charge under the supervision of a superior officer, of a licensed air harbor, including the flying field or water surface, hangars, airways, workshops, etc., at St. Hubert, will collect all operating fees, supervise aerial traffic and co-operate with customs officials at the port. Qualifications for the post include a license as commercial pilot and air engineer, and wide knowledge of the different types of aircraft.

"Water, there is a fly in the cup." "Well, after all, a fly can't drink much." -Jugend, Munich.

NEW CONFEDERATION BUILDING

Work on the new Confederation Building at Ottawa, of which the foundation stone was laid by Lord Willingdon on Confederation day last year, will be started this year. The building, which is to house government departments, will be of French chateau architecture, which will harmonize with the Château Laurier at the other end of Parliament Hill. The plan resembles a broad arrow, with a main wing of 250 feet on Wellington street and a side wing of 200 feet along Bank street, a third wing blanketing the angle. The Dominion has hitherto been paying out \$500,000 annually in rents for government departments, many of which are now accommodated in old houses or store buildings.

Canada's Basic Industry Sound

Agriculture in Canada Prosperous According to Dominion Statistics

Agriculture in Canada's basic industry, and agriculture is prosperous. According to the Dominion Bureau of Statistics, the Dominion's gross agricultural revenue was \$1,260,394,000 in 1922 and \$1,736,439,000 in 1927.

This represents an increase of approximately 35 per cent. in five years, and the percentages of increase in the gross agricultural wealth of the country for the same period is only slightly less. The figures are: \$474,685,000 for 1922, and \$7,963,400,000 for 1927.

For 1927, Canada, occupied farm lands increased in value to the extent of \$1 an acre in 1927 as compared with 1926 and last year stood at \$38 according to the bureau.

Farm lands in British Columbia last year had an average value of \$40 an acre, an increase over 1926 of \$2 and a figure far beyond that of any other province. Much of British Columbia's arable land is found in fertile valleys where it is cultivated extensively for fruit and vegetables. In the greatest grain province, had an average of \$26, with an increase in the year of \$1. Ontario increased its average from \$42 to \$45, and Quebec from \$24 to \$37.

The increased value and number of livestock is another evidence of prosperity. Canadian horses, cattle, sheep, swine and poultry in 1926 were valued at \$77,598,000. In 1927 the figure had gone to \$82,079,000, most of the increase being in cattle.

There are no figures in evidence to show the extent of farm indebtedness in the Dominion, but apparently in most cases mortgages are being carried without embarrassment. In the few years ago there were sections in Western Canada where farms freely were being abandoned to the mortgage companies. Today, after a succession of profitable crops and in a healthier atmosphere of optimism, this condition no longer exists. It is interesting to note that according to the latest census 85.7 per cent. of all Canadian farms were occupied by their owners, showing the numerical insignificance of the tenant class.

Color Matter of Preference

Brown Shelled Eggs Laid By Common Hens, While By Others

Color of the shells does not affect the food value of eggs. This statement from the poultry department of the University of Wisconsin College of Agriculture may be accepted with certain reservations by housewives who have always insisted on "white eggs" or "brown eggs." Eggs are entirely a matter of local preference, say the Badger poultry specialists, and as a result eggs of the color most commonly requested on any market are considered by the buyers in that community to be of superior quality.

Brown-shelled eggs are laid by common breeds, as Rhode Island Reds and Wyandottes, while white-colored eggs are produced by Leghorns, Minorcas and other Mediterranean breeds.

A Good Insurance Risk

Although he carries a blanket public liability insurance policy for \$100,000 on any air craft he may be flying, Col. Charles A. Lindbergh has not presented a single claim for damages in the thousands of miles he has flown since he piloted the Spirit of St. Louis from New York to Paris. This has been announced by the insurance company.

Reals Largest Potato Crop

Principals of Manitoba and Saskatchewan raise two-thirds of the potato crops reported by penal institutions of the Dominion. Nearly a third of a million pounds of potatoes are dug up every year at Stony Mountain, nearly as many figure in the yield at Prince Albert.

A Negro preacher has petitioned his bishop to sue with appeals for help that the bishop finally told him with the result of the trial that he did not want any more appeals from him.

The next week came another letter from the preacher: "Dear Bishop—I assure you this is not an appeal. It is a report. I have no pen."

Important To Beekeepers

The artificial mating of queen bees by which the beekeeper in future can make sure that excellent strains of bees can be perpetuated through generations with a resultant high grade of honey, was revealed by G. H. Cole, at the annual convention of the Manitoba Beekeepers' Association recently. The new discovery, he declared placed the industry on a controllable basis.

KEEPING CREAM COOL

Putting Cream In Can and Placing In Ice Water

With the arrival of warm weather cream producers who patronize a butter factory are faced with the problem of keeping the cream sweet and clean in flavor until delivery is made. Authorities of the Dairy and Cold Storage Branch, Department of Agriculture, Ottawa, express the view in pamphlet No. 37, entitled "Care of Cream For Buttery Making," that the easiest and best way is to put the cream in an ordinary shotgun can and place it in a tank of ice water immediately after skimming. This pamphlet shows an illustration of a suitable tank capable of holding four cans and sufficient for ice and water to keep the cream at a low temperature.

The tank is made with a space of four inches on all sides and on the bottom which is filled with sawdust or shavings. The cover is also insulated in a similar manner. The tank is lined with galvanized iron.

This tank, although regarded as a little expensive, is highly recommended on farms where the ice has to be shipped from the nearest woods. It makes a fair substitute. Whether tank is of insulated type or plain wood covers are of great importance, as they help to keep down the temperature of the water and cream.

This pamphlet, which can be obtained from the Publications Branch, Department of Agriculture, Ottawa, gives the results of an experiment which shows the great advantage of keeping cream in a proper container. The pamphlet, which is held for sixty hours at an average temperature of 45 degrees Fahrenheit, developed an acidity of only 0.05 per cent. When kept in a cellar for the same period the average temperature of the cream was 63.7, which allowed the acidity to reach 0.55 per cent. That is to say, cream held in the cellar had three times as much acid as that cooled in the ice water.

Western Alberta Minerals

American Investors To Develop Immense Lead and Zinc Deposits

Some initial work is to be done this summer on the development of an immense lead and zinc deposit in the north country just above the Alberta boundary. Mineral rights in this area are held by a syndicate composed of American and Canadian interests, and the work proposed for the coming season will consist of a series of experimental shafts with a view to determine definitely the extent and character of the deposit.

A working crew will go north for the purpose soon after navigation opens. The area to be thus developed is in the Great Slave Lake country about eight miles beyond the Alberta limit. It was prospectured before the war and rights acquired from the original prospector by an English concern. Owing to wartime conditions, however, no development work was done, and the English holders dropped the claim.

It is said that competent geologists have declared the area to hold the richest body of lead and zinc ore on the continent. Merely as a speculation, there is believed to be millions of tons of ore in the deposit and if the facts now about to be made show the deposits to have the expected depth there will be an almost fabulous quantity of the two minerals out of which to make a new Canada of the north.

Already there are visions of great transportation activity on the northern waterways if the development of the lead and zinc deposit of the top country is proceeded with. Freight will necessarily go in and come out of the Mackenzie route, connecting with McMurtry and the waterways rail line. Incidentally, lead has a special mining license. Extension of the railway into the north, instead of it.

Just A Report

A Negro preacher has petitioned his bishop to sue with appeals for help that the bishop finally told him with the result of the trial that he did not want any more appeals from him.

The next week came another letter from the preacher: "Dear Bishop—I assure you this is not an appeal. It is a report. I have no pen."

Important To Beekeepers

The artificial mating of queen bees by which the beekeeper in future can make sure that excellent strains of bees can be perpetuated through generations with a resultant high grade of honey, was revealed by G. H. Cole, at the annual convention of the Manitoba Beekeepers' Association recently. The new discovery, he declared placed the industry on a controllable basis.

JOHN O'BRIEN,

The popular hotel manager of the Canadian National Railway, who will again be in charge of Jasper Park Lodge, Jasper National Park, Alberta, has been manager of this Rocky Mountain summer resort since 1922.

Will Move More Buffaloes

Waterfront Herd Has Been Increasing Rapidly

It is expected that some 1,100 head of buffalo, mostly year-olds, will be shipped from the Waterfront Park early in June to the range in the far northern part of Alberta, where, during the past three years several thousand head have been transferred. The former monarchs of the plains have increased so rapidly in their numbers at Waterfront that their removal has far exceeded the carrying capacity of the pasture in the park. Reports from the vicinity of Fort Smith, in the northern boundary of Alberta, indicate that the animals which have been moved are thriving in their new home.

Assist Agricultural Colleges

In England and Wales there are seventeen institutions receiving grants from the ministry of agriculture. Six of the leading universities are granted money, though in no case does it exceed \$55,000. There are five colleges classed as agricultural, one as horticultural, a dairy institute, and a veterinary college. Altogether, the grants amount to \$225,000.

Hop Growing In B.C.

The John L. Haas Hop Company, of Vancouver, British Columbia, has recently acquired additional 80 acres just south of its present holdings, which will be utilized during the coming season. There were approximately 750 tons of hops grown in British Columbia last year, practically all of which have been shipped.

Over a thousand new homesteads

Over a thousand new homesteads were filed in the four western provinces during the months of January and February this year, being 1,006, as compared with 629 for the same two months' period last year. By November, Manitoba reports 74 homestead entries as against 71 last year, Saskatchewan 430 as against 333, Alberta 312 as against 213, and British Columbia 30 against 9.

Romance on C.P.R. Route

The Canadian spring had early influence upon Anne Hansen, 21, and Neils Christian Nielsen, 23, handsome young Danish immigrant couple who, on arriving at Winnipeg, decided to marry and, with the assistance of the Canadian Pacific Railway Colonization Department officials, did so forthwith. They had known each other in their homeland, Denmark, for many years, and had even been sweethearts, but on departing for Canada they had harbored no romantic ideas of thoughts of marriage. Traveling as strangers in a strange land, they met and found happiness in each other's company during the journey, and furthermore discovered their destinies to be close together. On reaching Winnipeg on their westbound trip, they decided to marry, and the C.P.R. Colonization department officials did the rest.

Rev. N. Danstov, immigration chaplain, led the groom in securing a special marriage license. His son Victor, a member of the colonization staff, hurriedly procured a gift bouquet from the Borealis as a gift to the bride from the company. An office adjacent to the Winnipeg immigration hall was cleared and prepared for the occasion. C. A. Van der Horst, the colonization agent in charge of the railway for Western Canada, volunteered to act as groomsmen, and Mr. G. McNeill, general passenger agent, to give the bride away; a group of twenty immigration and company officials gathered, and the stage was set for the ceremony, the first among newcomers for the season.

"I'll do have Andrea for my daughter," said Rev. N. Danstov. "I do!" responded Nielsen. The chaplain pronounced a special prayer for their guidance as strangers in the new land, charged them to continue faithful to one another, repeated the Lord's prayer, gave the benediction, and the sign of the cross, and Andrea and Neils Christian were declared man and wife.

They continued their journey westward in the same train, with the hundred settlers, Danes, Dutch, and English—who were travelling at that time with the Canadian Pacific.

London Has Repair Shop For Lifeboats

Those Put Out Of Commission—Around Coast Are Immediately Replaced

In an out-of-the-way corner of the River Thames in the port of London is a lifeboat hospital. The doctors are old hand mechanics of whom have long been connected with the lifeboat service.

The hospital is the repair and store depot of the Royal National Lifeboat Institution. One enters, from the street through a small door, just as though going into an ordinary house, but once inside the shutters are closed, writes W. L. Seymour, in Pearson's Weekly. There are busy yards, machine shops, and store rooms where they keep a stock of everything necessary, from spare lifeboats down to metal polish.

Eight or nine lifeboats fully equipped, are always kept "standing by" ready to be rushed off to replace any that may be put out of action around the coast. Day and night someone is always on duty, prepared to summon all hands to dispatch a lifeboat immediately. No boat is ever kept in stock—they go direct from the builders to the station for which they are intended.

Maintenance the damaged lifeboat is being returned to the yard, and on arrival she is immediately overhauled, put into a thorough state of repair, re-equipped, and then put on stock, ready to take her turn again. No new boats are ever kept in stock—they go direct from the builders to the station for which they are intended.

Plant Has Peculiar Seed

Gent's-Head Equipped With Parachute Which Expands and Contracts

Gent's-Head, a European plant has a seed that could almost be said to walk. It is equipped with a parachute, which expands and contracts, by which it drifts for a distance through the air, and by the action of which it is able to move along the ground after it lights. The effect of alternate expansion and contraction of the parachute is to make it expand and contract, so that unless the seed has landed on soil, where it can take hold, the seed will drift along day after day until a favorable spot is found.

New Homesteads In West

Over a thousand new homesteads were filed in the four western provinces during the months of January and February this year, being 1,006, as compared with 629 for the same two months' period last year. By November, Manitoba reports 74 homestead entries as against 71 last year, Saskatchewan 430 as against 333, Alberta 312 as against 213, and British Columbia 30 against 9.

NEW POPULAR BEVERAGE

Four Thousand Gallons Of Tomato Juice Consumed Annually At Health Resort

Tomato juice is a popular beverage at French Lake Springs, a well-known health resort, says The Modern Hospital. According to the manager, H. J. Tompkins, the guests consume over four thousand gallons of the specially prepared tomato juice each year. In commenting on this, Mr. Tompkins says: "Six late years physicians and dietitians have demonstrated that the juice of the tomato contains many beneficial elements, the chief of which are the vitamins A, B and C, and the recently discovered vitamin K, which assists the red blood cells in absorbing iron from the blood. These are necessary for nourishing and strengthening the entire human organism."

Tomato juice may be served plain or with a pungent seasoning in it," says The Modern Hospital. "One method of preparing it is to pour the juice of the tomato into a large pulp through a sieve. Chill and season with salt and pepper. Add lemon juice, tabasco, or Worcestershire sauce, if desired or any other seasoning."

"The use of canned tomato juice has been growing ever since the discovery of the canning process as a preservative of vitamin C, which not only prevents scurvy but is essential for growth and good health. Much of this conservation is due to the acid content of the tomato. In addition to vitamin C, this method of canning process adds a source of vitamins A and B."

"Increasing popularity of the tomato as a source of vitamins is due to the fact that it can be obtained all the year around at a comparatively small cost, and because the labor of preparing it for use is smaller than for almost any other source of the vitamins, a matter of importance in the hospital or health resort."

Will Not Incure Large Debt

But Highway Building In Saskatchewan Will Be Speeded Up

"No one had ever criticized the highway map of the Province and the type of earth roads as good as any built anywhere, and they are well designed," says Hon. Geo. Spence, the Saskatchewan Minister of Highways. "Labor and industry goes on to point out the economical aspect of highway building and travelling which is being commenced this summer. 'The Province is in a splendid financial position today. We are going to build a highway system that will not run into debt. Colonization is needed, but colonization is a human problem. You can't dump people into the country and not take care of them. Provincial highways had been built to serve points in the East, West, North and South, but no government can build more highways than the people can pay for. They must be built where they will give the greatest service.'"

"An survey will be proceeded with this summer; the Dominion government will do this," he said. "They will supply the equipment, but the provincial government will be able to give the information to the people. Tourist traffic by lake and river will be made a study, but until the fullest information is obtained no car can be made. It would not be safe. The work of constructing the road into the new park in the North is under way. It will be completed in time for the opening of the park in August, and in July will begin the work of removing the loose boulders from the river and Montreal Lake. When this is done it will open up a fine waterway route in the tourist district."

No Argues— "I'll do have Andrea for my daughter," said Rev. N. Danstov. "I do!" responded Nielsen. The chaplain pronounced a special prayer for their guidance as strangers in the new land, charged them to continue faithful to one another, repeated the Lord's prayer, gave the benediction, and the sign of the cross, and Andrea and Neils Christian were declared man and wife.

They continued their journey westward in the same train, with the hundred settlers, Danes, Dutch, and English—who were travelling at that time with the Canadian Pacific.

"I'll do have Andrea for my daughter," said Rev. N. Danstov. "I do!" responded Nielsen. The chaplain pronounced a special prayer for their guidance as strangers in the new land, charged them to continue faithful to one another, repeated the Lord's prayer, gave the benediction, and the sign of the cross, and Andrea and Neils Christian were declared man and wife.

Crop Planning Of The Farm

Keeping a Record Of What Crops Are Grown In Rotation

In order to keep a record of what crops have been grown each year on all the fields of various parts of the farm, it is desirable to draw each year a small plan of the farm. On this plan a farmer can write the crops which have been obtained. If desired, such additional information may be recorded as dates of ploughing, seeding and harvesting. When this plan is made every year, it facilitates the following without error of any rotation which may be desired. It enables one to learn what fields produce the largest yields of certain crops, providing information to enable the improvement of the rotation along the line of adapting certain crops to soils to which they are suited. Observations may be recorded regarding the present value of various parts of the farm, where soil drifting has occurred, where manure has been applied, and any other points of interest. Above all, such a plan provides a definite record of the results of each year on the land and over a period of years. Very much business farming is a long-time business and records are necessary if much improvement is likely to be made.

This method of keeping farm records will be kept easily available. It is possible to use a few pages in the notebook. A record of all receipts and expenditures and to record once a year an inventory of the value of each year's progress. Farming is a long-time business and records are necessary if much improvement is likely to be made.

Hudson Bay Possibilities

Development Of Northern
Country A Matter Of High
Anticipation

The belief of Canadians in their north country has been steadily growing in recent years. What is commonly spoken of as the hinterland has seen an active development and there are visions now of that development extending down the MacKenzie Valley towards the Arctic Circle.

It is beginning to be recognized that the development of the country about Hudson Bay, and of the islands and waters of the Bay, is comparatively near. What appear to be valuable mineral discoveries on both sides of the Bay, and the providing of ready access by means of the Hudson Bay Railway, will give a great impetus to the development of this whole northern region. In former years, it seemed very remote and very unlikely to have much to do with the active life of the Dominion. But the change is in prospect and it may come rather quickly. Besides the Hudson Bay Railway, the Ontario

Government is extending its railway up to James Bay, and it will be only a matter of time until a railway is built north through Quebec up the east side of Hudson Bay.

Hon. Charles Dunning declares on the possibilities of the Hudson Bay country in an article on the coming northern route through the Bay in a special number of the Montreal Herald. He refers to the minerals, timber, waterpower and fisheries, and mentions particularly the iron ore on the east side of the Bay that may be available for western manufacturers. He also sees the possibility of offsetting the isolation of the Maritime Provinces by the development of an extensive trade between them and the West by this northern water route. What Canadians may expect from the development of the Hudson Bay country, he intimates, may be gathered from a consideration of the development of Northern Europe, where Sweden, Stockholm and Oslo are all north of the latitude of Port Churchill, while Moscow is only a little south of it. In the Canadian north, he intimates, may be gathered from a consideration of the development of Northern Europe, where Sweden, Stockholm and Oslo are all north of the latitude of Port Churchill, while Moscow is only a little south of it. In the Canadian north, he intimates, may be gathered from a consideration of the development of Northern Europe, where Sweden, Stockholm and Oslo are all north of the latitude of Port Churchill, while Moscow is only a little south of it.

In regard to the shipping route through the Bay, Mr. Dunning speaks of the advantages of sending our grain by an all-Canadian route, an incident result of which will be that "it will grade 100 per cent. Canadian on reaching its destination." As for the duration of the shipping season, he says that that has not yet been definitely ascertained but that "we do not permit 'the croaker to alarm us because we know what it is customary to accomplish in even a short season of intensive navigation of the Great Lakes when the crop begins to move."

The direct and indirect result of

the opening of the route are matters of high anticipation to the people of the West—Manitoba Free Press.

BUILD ARMORED BOATS FOR FOREIGN POWERS

Several Under Construction In
England But Owners
Unknown

High-speed armor motor boats are being built at London for unnamed foreign power, according to the spokesman for John Thornycroft Co., the builders.

Two other boats of this type which have been completed for the Dutch naval flag, are an improved development of the famous coastal motor boats first used in the war.

It is understood that these new building are not being constructed for the Dutch navy. The purchaser's name has not been disclosed.

The boats are 55 feet long and do not weigh over 15 tons loaded. They are powered by two 370 horsepower engines and are capable of doing 23 knots. Their beam is 11 feet, and the draught, when stationary, about three feet three inches.

When under weigh a single-step hydroplane lifts the bow clear of the water and they do not draw more than a few inches. Because of their high speed and shallow draught they are particularly adapted for cruising mine fields.

Two torpedoes, fitted with a special releasing gear for dropping them when the boat is travelling at full speed, are the chief feature of their armaments. They also carry Lewis guns and depth chargers. The latest addition to the installation of a smoke-screen-forming apparatus.

Foreign navies are said to have been giving this type of boat particular attention lately. Italy is reported to maintain 132 of them in the Adriatic, and the Soviet Government has 25. Though France and Japan have only two apiece, they are both reliably reported to be building more.

A crew of three men is required to operate these boats.

REMARKABLE SERIES OF SUBTERRANEAN CAVES

Found In Selkirk Range Of
Mountains In B.C.

Near the summit of the Selkirk Range, in the Coast Range of British Columbia is one of the most remarkable series of subterranean passages found in this continent. These passages are the Naikina Caves in the Selkirk Range, one of the scenic areas administered by the National Parks of Canada, Department of the Interior.

About four and one-half miles west of Glacier station the Cougar Creek valley opens up to the north, revealing very beautiful alpine valley opening at its head into one of these hanging valleys. The valley is occupied by a glacier, so often found in part of the mountains. To the north Mount Bagheena, Catamount peak, and Mount Tread Mountain, and to the west and south Cougar mountain valley in the head of the valley. All of these peaks are glacier-clung and down stream alpine river units to form the little alpine river known as Cougar Creek. Some a stream of considerable size, it comes cascading down the valley through meadows bright with alpine flowers; but suddenly it is snatched down into the bowels of the mountains. About 450 feet further it reappears, flows for a little in the light of day only to disappear again into subterranean darkness.

Three times in the course of a mile it is caught down in this way and then the waters disappear finally by a fourth underground channel. Ward, rumbling noises like low thunder and the sound of rushing waters which may be heard below give rise to the Indian name "Naikina" which means "Spirit's noises."—Natural Resources.

Expansion Of B.C. Industry
The expansion in industry in British Columbia is disclosed by the annual report of the Workmen's Compensation Board, which shows that the 1927 payroll, when completely audited, will total approximately \$175,000,000, or nearly 50 per cent. higher than in 1921. The number of employing firms increased in the same time from 6,280 to 8,243. Of those operating in 1927, no fewer than 1,643 were employing labor for the first time.

Spring Bull Sale

The spring bull sale, an annual event in Calgary, since 1901, broke all records for prices. Approximately 400 bulls were sold at an average price of nearly \$300. The champion Hereford sold for \$1,125.

Don't believe all a man says about his neighbor, nor half he says about himself.

Experience of more than thirty years has proven that aluminum is the only completely satisfactory material in which to pack tea. Red Rose tea is put up only in aluminum, and a "money-back" guarantee goes with every package.

Says Sharks Seldom

Bite Human Beings

Less Dangerous Than Automobiles
Says Director Of Tropical

Sharks seldom bite human beings, and, as a matter of fact, are less dangerous than automobiles, William Beebe, director of tropical research for the New York Zoological Society, told the students at Swarthmore College, Pennsylvania, in a lecture the other night.

Mr. Beebe said that after careful research he had found only eight human beings who had been bitten by sharks.

The naturalist has associated with sharks on tours of unusual intimacy, for he came in contact with more than 400 of them last year while, clad in a bathing suit and a diving helmet that he wore on his head, he took ten pictures under Haitian waters. He showed the pictures during the lecture.

Mr. Beebe plans another expedition which when he will enter a brass diving cylinder equipped with apparatus to manufacture oxygen and attempt to descend a mile under water.

MANY MOTHERS

RECOMMEND THEM

Baby's Own Tablets Are Fine
For Nervous, Sleepless
Children

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children.

One of the best remedies for children's ailments I have ever used," says Mrs. Arthur P. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I gave her one of these tablets and she was asleep at once. She was also troubled with colic and nothing seemed to help her. I had used the Tablets but a short time before her troubles were relieved. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy. Baby's Own Tablets are sold by all druggists and are a valuable remedy. Price, 25 cents per box, by The Warner Medicine Co., Brockville, Ont.

Tap Flier Was Ambitious

Not satisfied with his first record for night flying, Captain Tosko Kato, of the aviation school at Tokyo, immediately flew again and established a new record. He hopped off at 5:30 o'clock in the evening and broke 1:25 minutes his previous record of six hours in the night air. He immediately flew again and immediately broke 1:25 minutes in the morning, setting his previous record of the night by three hours. Most of his flying was in dense fog.

Could Hardly Live For Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhalant smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

There are people so constituted that they never speak well of a man till he is dead.

Love and potatoes must be akin they both spring from the eyes.

**ACQUA REALS
LARGE PIMPLES
Caused Itching Burning,
Also Disfigurement.**

"My complexion was completely marred by pimples which varied in size. Some were large, hard and ugly, while others were just red and itchy. I was so bothered by this burning sensation, also disfigurement."

"After using courses of remedies for over two years, with little result, I sent for a free sample of Cuticura Soap and Ointment. I was so pleased with the results that I purchased more, and after using two boxes of Cuticura Soap and a large box of Cuticura Ointment I am completely healed." (Signed) W. E. Blackburn, 26 Bellevue Ave., Toronto, Ont.

Use Cuticura to clear your skin. Send for Free Book. Address: Cuticura Sales Co., P.O. Box 100, Station A, Toronto, Ont. Cuticura is sold by all druggists.

Teeth and Health

Issued By The Canadian Dental Association and Published By The Saskatchewan Dental Society

WHY "NEW TEETH FOR OLD?"

Perhaps you were wondering why little money had to lose his "baby" teeth and have them replaced with new ones.

Why, you asked yourself, do they not remain permanently and develop in size during the growing years, just as do the ears and eyes?

"Because they become decayed," you say; but not necessarily so since tooth decay is a disease and is therefore abnormal and preventable; and for that matter, when you lose a tooth through decay at six and twenty, does a new tooth replace it?

Just consider: You have seen a little sapling grow to be a big tree—"large oaks from little acorns grow"—but did you ever hear tell of a small apple growing to become a large stone?

Why, likely so, and for obvious reasons, for, as you know, the tree is of organic matter, while the stone is of mineral matter.

Now the tooth, being composed largely of inorganic matter, especially the outer enamel covering, is not of the organic nature, like the apple, and cannot of itself change in form, so grow larger once it is fully developed.

Obviously too, a young little sapling has a room for the larger teeth which will need when he is fully grown. It is only the potatoes that "from little ones to big ones grow" we have instead, "new teeth for old."

These little teeth then, so temporarily for mastication until the larger permanent teeth are sufficient to develop to accommodate the larger permanent teeth of adult age.

They are another Nature's expedient, as it were, and a good expedient too, if given half a chance.

Little Helps For This Week

"Inasmuch as ye did it not to one of the least of these, ye did it not to me."—Matthew xxv. 45.

Living, though dead not live if mercy's spring run dry. What heaven has lent thee wilt thou then freely give?

Dying, thou shalt not die. He promised even so. To these lips repeat.

Behold, the Lord that soothed thy sister's woe. Have washed thy Master's feet.

—Oliver Wendell Holmes.

The final test of religion at its best is not religiousness, but love; not what I have done, but what I have believed, but how I have discharged the common charities of life.

By what we do not do, by acts of omission—we are judged. It could not be otherwise. For the withholding of grace is the negation of the spirit of Christ, the proof that we never knew Him, that for us He lived in vain.

—Henry Drummond.

Recipes For This Week

(By Betty Barclay)

CREAM OF ASPARAGUS SOUP

Wash each stalk of asparagus carefully with a vegetable brush to remove all grit. Then cut in small pieces (using all but the very tough parts). Cook covered, until the asparagus is tender, in enough water to cover. Add salt to taste just before the asparagus is done. Add two cups cooked asparagus and cooking water to 2 cups medium cream sauce (2 cups milk, 4 tablespoons flour, 4 tablespoons butter). Season and serve hot.

Note: The less tender part may be cooked longer and put through a sieve. If desired, the soup may be used for salad).

FRUIT BLISS

2-3 cup sugar.
1-3 cup water.
2 egg whites.
4 tablespoons lemon juice.
12 color paste.
3 cups fruit.

Boil sugar and water five minutes. Pour over egg whites, cook over hot water until thick, stirring constantly. Add lemon juice and red color paste and chili. Pour over fruit, using pappayas, oranges, red cherries and strawberries cut in pieces. Serve very cold. Serve 4.

Enlisting Their Sympathy

Counsel for the victim of a motorist accident: "Gentlemen of the jury, the driver of the car states he was going only four miles an hour. Think that is true. I am a lawyer, and I am the victim, as the car drove over his body at four miles an hour!"

"I see you are getting all the girls off your hands."

"Yes, but the worst of it is I have to tell their husbands on their feet."

Neuralgia succumbs to Minard's Liniment.

THERE is nothing quite equal to Aspirin for all sorts of aches and pains, but be sure it is Aspirin. The name Bayer should appear on every tablet. Bayer is genuine, with the word genuine—in red—is on every box. You can't go wrong if you will just look at the box when you buy it.

Salt Essential To Health

Is One Of The Four Prime Necessities Of Life

Salt is necessary to life and health. Deprived of salt, disease and ultimate death would follow. In certain parts of the world where salt is scarce, salt is used in lieu of cash in trade and barter. Salt ranks with water, bread, sleep as one of the four prime necessities of life. A medical man stated recently that the chronic ill-health of many people is due to their underconsumption of salt; they take too little in condiment form, and even less in vegetables, such as cabbages, which contain valuable salts.

Look at your salt-cake. Each white grain of glistening salt is a perfect crystal. In a tiny pinch there are thousands. They will pass to every part of your body—blood, brain, tissue, and bones—and do their health-keeping work.

Wrong Idea Of Sin

More should be written about the pleasures of virtue. The old theology gave the impression that sin is deplorable and that those who forego it are missing the most thrilling in life.—American Magazine.

Minard's Liniment For Toothache.

"Let's look at this budget sensibly. You can't save money even on paper."

"But I do. I got fifteen sheets of paper for 10 cents today."

Why Firestone Tires Give Most Miles Per Dollar

The greatest enemy to life is not the harsh grind of city streets and the rough road which is created inside the tire by internal friction. Heat and wear weaken the fabric, but also soften the rubber, causing blowouts and tire failure.

The above illustration shows a cross section of Firestone tires. The greatly magnified and unvarnished inner surface of the tire shows every fibre is insulated with rubber, which prevents internal heat and friction.

Your local Firestone Dealer gives you the better service that goes with these better tires. See him today.

Drive...
with 4 speeds forward

YOU will sense a real difference in performance when you drive a Graham-Paige six equipped with four speeds forward. There is nothing new to learn—the gear shift is standard. A car is at your disposal.

Joseph P. Graham
Robert C. Graham
Ray A. Graham

Five chassis—sixes and eights—
prices ranging from \$145
to \$350. Car illustrated is
